Thanks for the quick response Eugenia.

Do you know why the split sample from 338 was discarded?

LBG did collect a split sample at Location 338; however, the split sample was NOT shipped for analysis. The sample was discarded.

If you have any other questions, let me know. Thanks

Subject: FW: EPA Split Sample IDs

Good Morning Eugenia,

Please see email from ARCADIS below. I looked back in Tierra's field logbook on 11/3, and noted that an EPA split was taken on location 338. Can you please confirm with LBG if a split was indeed taken at this location, as it was not identified as such on the COC provided?

I appreciate it,

Thanks

Subject: RE: EPA Split Sample IDs

Hi Brian – I was reviewing the chains provided by EPA and I noticed that we have recorded in our field logbook that EPA collected a split from location 338 on 11/3, but I don't see it on their chains. Could you please check with EPA to find out if they collected a split from this location?

Thanks,

Jamie

Hi Jamie,

See attached.

Thanks

Subject: EPA Split Sample IDs

Hi Brian – do you by chance have a copy of the chain of custody forms that EPA completed for their split samples? I was hoping to include their split sample IDs in the field report. I have a table that lists the split samples along with our IDs and I'd like to add their IDs if possible. If not, I can leave that piece out.

Thanks,

Jamie
